

Safety Track

10" Monitor

Installation Guide

A detailed guide on how to install your monitor and connect it to your Safety Track solution.

Accessories Included:

- Bracket
- Power Cable with 12V connector
- RCA Cable
- Monitor

Installation:

1. Remove Unit from Box

- First, remove the monitor and bracket from the box
- Attach the bracket to the back of the monitor with 4 screws (if not already done)

2. Complete Bracket

- Once the attachment side of the bracket is attached to the monitor, open the other half of the bracket with a fastener
- Attach both parts of the bracket together and tighten

3. Connect the RCA Cable and Power Cable

- Connect the Yellow to the back of the DVR for video out. The other end, as shown below, goes to the video in on the back of the monitor.
- Red is the power for the monitor.

4. Complete the Unit

- Below is a picture of the completed unit
